Unit description

This unit aims to equip students with a deep understanding of and the ability to evaluate the applications of hearing aids, implantable devices, and assistive listening systems. The unit develops students' understanding of the mechanisms by which hearing devices meet the needs of hearing impaired people and the evidence for the effectiveness of a variety of technologies. In a wider sense this unit aims to equip students with the skills and information needed to evaluate existing and emerging hearing device technologies to provide evidence-based treatment.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO2: Examine and appraise signal processing; its importance in regulating the advanced features of hearing devices and its strengths and limitations

ULO1: Extend basic knowledge acquired in CAUD805 to a more in-depth understanding of the complex technological features of modern hearing devices.

ULO3: Debate and critically evaluate the clinical benefits/efficacy of hearing device technology

ULO4: Translate theoretical knowledge to technical skills, and practical aspects of hearing device selection and fitting.

ULO5: Implement knowledge and skills to facilitate clinical practice including; fitting, verifying, measuring the outcomes and evaluating future technologies of hearing devices

Assessment Tasks

Coronavirus (COVID-19) Update

Assessment details are no longer provided here as a result of changes due to the Coronavirus (COVID-19) pandemic.

Students should consult [iLearn](#) for revised unit information.
