Unit description

The study of curriculum is central to our understanding of educational institutions. It can be focused on the learning of a single student or group of students; on the formal curriculum of a school or other educational workplace; or it can be expansive in its national and international focus. This unit encompasses each of these areas and introduces you to the breadth of curriculum studies. It considers the nature of curriculum, the relationships between curriculum, knowledge and ideology, curriculum planning, curriculum implementation and evaluation, curriculum change and curriculum futures. The learning tasks in the unit focus on developing an understanding of advanced concepts in the curriculum field. Current issues being researched or unfolding in the curriculum literature are also considered with a view to identifying research trends and possibilities.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1:** Discuss the strategic importance of research in the curriculum field

**ULO2:** Analyse current research debates in the curriculum field, including the nature of curriculum, the relationships between curriculum, knowledge and ideology, the foundational disciplines that underpin curriculum studies, and the dynamics of curriculum planning, implementation and evaluation

**ULO3:** Critically assess curriculum priorities, change processes and preferred curriculum futures in an educational jurisdiction

**ULO4:** Identify key themes, trends and issues in curriculum research
