Unit description

This foundation unit facilitates student transition from undergraduate studies to the scientific research environment. The unit provides advanced training in research methods and develops a variety of practical skills that are required to become a successful researcher in Earth and Environmental Sciences. Students will shadow a current PhD student or staff scientist to experience some of the active research being conducted within the department. Students will be trained in technical software and will investigate research techniques relevant to their specific research interests.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate a working understanding of strategies and methods of conducting research in the Earth and Environmental Sciences as well as knowledge of general research tools and practices.

ULO2: Actively engage with on-going research activities in the department and develop hands on experience with the methods used.

ULO3: Analyze the ethics associated with their scientific discipline and how it relates to publishing scientific research papers

ULO4: Apply effective communication strategies for sharing research results in writing, oral and graphical form.

Assessment Tasks

Coronavirus (COVID-19) Update
