Unit description

This unit addresses the fundamental and dynamic issue of the protection of human rights in international law. The unit traces the historical development of human rights law at national, regional and global levels. The unit considers the theoretical frameworks for analysing the rights of individuals and groups and the duties of states to protect those rights. It considers the strengths and limitations of the institutions and mechanisms in place to protect and promote rights in practice. The unit includes consideration of the cross-cultural dimensions and other tensions inherent in this area of international law, with a focus on contemporary challenges for international human rights law.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: demonstrate, both orally and in writing, an understanding of the foundations and evolution of the international human rights law system — within the broader international law framework — and the resulting strengths and weaknesses of the system.

ULO2: evaluate and compare, both orally and in writing, the mechanisms available for monitoring and enforcing human rights standards in different international and regional systems.

ULO3: engage constructively with various critiques and theories of human rights — for example, whether rights are universal or particular — and be able to critically discuss, both orally and in writing, the significance of those approaches in the development, interpretation and operation of international human rights law.

ULO4: reflect on past and present international developments, both orally and in writing, and be able to analyse, interpret and explain such developments from an international human rights law perspective.
