General Information

Unit convenor and teaching staff
Credit points 10
Prerequisites 50cp at 2000 level or above
Corequisites
Co-badged status
Unit description This unit examines the characteristics of the language of science, mathematics and technology, exploring the different ways in which language is used in professional, popular and pedagogic texts. Special reference is made to changing language use at the secondary and tertiary levels in both English and second or foreign language settings. The increasing use of visual imagery, the influence of web-based forms of scientific communication and the role of metaphor in science are also examined. The unit concludes with a discussion of the implications of the characteristics of the language of science for teachers of both language and science. The unit is of interest not only to students who are looking to follow careers in second or foreign language teaching and to those who are studying science or mathematics with a view to teaching, but also to anyone interested in how language responds to the challenges of different purposes and audiences.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

- ULO1:** Discuss the ways in which meaning systems (including figurative language and multimedia) construct and represent the scientific world view in professional, popular and pedagogic scientific contexts.
- ULO2:** Analyse the differences between the representations of scientific knowledge for professional versus popular versus pedagogic audiences.
- ULO3:** Appraise the role of visual communication in scientific texts (print-based, electronic and multimedia).

ULO4: Critique changes in the language of science in scientific pedagogic textbooks
(from early secondary to secondary to tertiary level).
