Unit description

This unit provides an introduction to two additional therapeutic modalities not already covered in PSYP8901 or PSYP8903. Theory and skills training is provided in two additional therapeutic modalities with a strong research evidence base that are highly regarded by many professional psychologists, Interpersonal Psychotherapy (IPT) and Dialectical Behaviour Therapy (DBT). The key elements of each of these approaches are examined and illustrated. As with PSYP8903, the unit is interactive and experiential in that students are supervised whilst observing and practising application of the different approaches. Students are again asked to reflect on the sorts of presentations most likely to benefit from each approach and whether and how these approaches might be integrated with each other and with other treatment approaches.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Evaluate theoretical models, empirical evidence and approaches for various therapeutic based interventions.

ULO2: Review the clinical stages and goals of treatment for various therapeutic based interventions

ULO3: Recognise the role of a psychologist with the issues and obstacles inherent in working professionally with clients and other professionals.

ULO4: Develop professional skills for Interpersonal Psychotherapy and Dialectical Behaviour Therapy.
