Unit description

Theories and other frameworks in business, management and economics help organise knowledge objectivity by framing how and why individuals, organisations, and other entities behave the way they do. Understanding how and why behaviours occur is important for researchers because it provides them with explanations underpinning human behaviours. The focus of this unit is on developing your knowledge about seminal and contemporary research from a theoretical perspective. You will explore theory and research relevant to your discipline and their various interpretations to develop an appreciation of the scope of theory and research. In particular, you will develop knowledge, critical analysis, and creative thinking to examine and explain theory and research to solve research problems. You will also learn how to critically evaluate, synthesise, explain theory and concepts, and communicate your ideas to extend available theories in your discipline area.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Survey, critically analyse and evaluate research and theory used in seminal and contemporary research (in your discipline area).

ULO2: Identify, synthesise and apply theory and research to develop ideas and propose ideas for potential new research opportunities (in your discipline area).

ULO3: Communicate theory and research specific to the academic standards and conventions (in your discipline area) to an audience.
