Unit description

Demographic factors are important in affecting market segmentation and business behaviour. Managers in private and public sectors often utilise and analyse relevant demographic data to assist their decision making. In this unit, students learn the application of a range of demographic techniques in analysing and understanding market segmentation and demographically diverse business behaviour. Students are provided with access to the major sources of demographic data and employ data analytics tools. Contemporary demographic issues are examined in a range of contexts.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Identify and describe demographic concepts and techniques to analyse consumer populations in Australia and other countries.

ULO2: Gain practical skills on evaluating data, information and literature to solve problems.

ULO3: Analyse aspects of sustainable development, such as the impacts of global demographic changes on resources and the impacts of household life cycles on

consumption.
