Unit description

The widespread integration of information and communication technology (ICT) throughout society and the increasing consumer reliance on the internet has created new ways of communicating, disseminating information, and organising and conducting business. These new technologies have changed the basic economics of goods/services around the world and are causing organisations to continuously re-examine established business models, principles and practices. This unit will develop your ability to assimilate technological change and to understand the key challenges firms face in a digital economy. Above all else, the unit explores the major issues firms must consider when incorporating the internet into their strategy.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Analyse key theories and concepts in e-Business.

ULO2: Critically reflect on the impact of e-Business on business models and strategies.

ULO3: Work independently and collaboratively to research and apply theoretical and practical knowledge to solve business problems in an e-business environment.

ULO4: Develop and professionally communicate a coherent e-Business strategy and e-Business plan.
