Unit description This unit is designed to provide hands-on experience by direct interface with molecular science underway in the Department of Chemistry and Biomolecular Sciences. Students will participate in the programs of two distinct research groups over the semester and navigate typical situations encountered as members of a scientific research team. They will engage in a range of pertinent laboratory activities, receive preparative training in advanced molecular techniques from research scientists, and attend team meetings at which experimental data are reviewed and research planning is encountered.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Describe contemporary research practice through participation in several teams engaged in molecular science research

ULO2: Carry out a selection of advanced laboratory procedures, incorporating safe handling of materials (chemical or biological)

ULO3: Actively participate in data collection and report/reflect on experimental findings to the research team

ULO4: Maintain a daily record, to research-level standard, of laboratory work undertaken and results obtained
