Unit description

This unit offers an introduction to developmental issues in clinical neuropsychology. There will be a focus on developmental changes in brain structure as well as the development of the major functional systems such as language, memory and executive skills. A range of common developmental and acquired conditions of childhood will be covered and their associated neuropsychological features will be discussed in detail, with an emphasis on the consequences for clinical assessment and management. Clinical case presentations and examples will be used extensively throughout the course.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate In-depth knowledge of pre-natal and post-natal brain development that can be applied clinically.

ULO2: Understand in-depth how cognition develops over time and the clinical applications of these changes.

ULO3: Apply appropriate tools to assist with gaining rapport and managing difficult children to comprehensively and validly assess a child.

ULO4: Demonstrate an in-depth understanding of a wide range of developmental and acquired brain disorders that can be applied clinically.
