Unit description

This is the first Supervised Practical Placement unit and comprises an overall workload of approximately 250 hours under the close supervision of a qualified field supervisor at the Macquarie University Psychology Clinic. As such it provides the opportunity to put theory/ techniques gained in coursework units into practice. In this unit students will be developing their knowledge of relevant clinical conditions, and the advantages and disadvantages of particular neuropsychological assessment procedures. Students should have the ability to seek the relevant knowledge, if this is not already available, and to begin to generate hypotheses about what to expect. Students will also begin to develop interviewing, interpretation and report writing abilities, providing them with solid foundational skills to pursue external placements. Students are required to complete at least a thousand hours across all placements in the program to meet accreditation requirements.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Apply neuropsychological knowledge and scholarly understanding to determine client needs and design and implement evidence based interventions.

ULO2: Communicate effectively across a wide range of client groups, colleagues and other professionals, taking into account developmental and cultural considerations

ULO3: Demonstrate knowledge of the legislative frameworks relevant to clinical neuropsychologists and undertake practice according to professional standards and the Psychology Board of Australia's code of ethics.

ULO4: Demonstrate the entry level capabilities required of practising clinical neuropsychologists, including the professional and personal skills for assessing continuous development needs.
