Unit description

This unit is designed as an introduction to common neuropsychological disorders including disorders of memory, adaptive functions, perception, praxis and language. Models of normal and abnormal function and case examples of dysfunction are presented. This unit is designed to provide insight into how neuropsychological disorders typically manifest. It provides students with an understanding of how functions such as memory, adaptive abilities, perception, praxis and language are typically disrupted as a result of neurological dysfunction. The unit relates to material taught in psychological assessment, professional practice, neuroanatomy and neuropsychopathology.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate understanding of the difference between psychological and neuropsychological assessment.

ULO2: Demonstrate in-depth knowledge of the ways in which acquired brain damage can disrupt cognitive functioning

ULO3: Demonstrate knowledge of the key characteristics of neuropsychological

disorders, and how to identify these in a clinical setting

ULO4: Appropriately interpret neuropsychological test results including base rate analysis
