Unit description

This unit comprises an overall workload of approximately 250 hours under the supervision of a qualified field supervisor. At this stage students should be approaching independence on the more routine or uncomplicated assessments. The students should be able to move from the history to formulation of hypotheses and selection of tests. The students should also be approaching independence in writing reports in which integration of data from the history, test results and behavioural observations is achieved. The ability to see the implications for diagnosis and/or management and to make appropriate recommendations should be developing at this stage. Students are required to complete at least a thousand hours across all placements in the program to meet accreditation requirements.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1:** Apply neuropsychological knowledge and scholarly understanding to determine client needs and design and implement evidence based interventions.

**ULO2:** Communicate effectively across a wide range of client groups, colleagues and other professionals, using a variety of formats, taking into account developmental and cultural considerations

**ULO3:** Demonstrate knowledge of the legislative frameworks relevant to clinical neuropsychologists and undertake practice according to professional standards and the Psychology Board of Australia's code of ethics.

**ULO4:** Demonstrate the entry level capabilities required of practising clinical neuropsychologists, including the professional and personal skills for assessing continuous development needs.
