Unit description

In this advanced unit we study speech perception as the mapping between the speech signal (be it auditory or otherwise) and mental/phonological representations. After providing an in-depth theoretical analysis and literature review of the key topic of choice, we will move towards designing, implementing, and analysing the results of a pilot study addressing a cutting-edge research question in this domain. This unit provides students with essential theoretical and practical learning experiences that develop the concepts and skills necessary for advanced research in speech perception, and phonetics and phonology more generally.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Critically evaluate and articulate concepts, past and current theory, and empirical findings around speech perception topics.

ULO2: Create and conduct methodologically valid, feasible, and ethical speech perception experiments to test cutting-edge research questions.

ULO3: Analyse and report on the results of speech perception experiments.

ULO4: Clearly communicate in spoken and written academic contexts about speech

perception theories and research.

Assessment Tasks

Coronavirus (COVID-19) Update

Assessment details are no longer provided here as a result of changes due to the Coronavirus (COVID-19) pandemic.
