Unit description

This unit focuses on advanced theoretical aspects of phonetics and the theoretical principles underpinning the study of speech production. The unit provides targeted training in the phonemic and phonetic transcription of spoken English with a concentration on Australian English. Students develop an understanding of sound systems and their function in language. They learn to use segmental and/or prosodic transcription systems to support a thorough understanding of the articulation of vowels and consonants, as well as the intricacies of complex articulations, airstream mechanisms, laryngeal features, coarticulation, and intonation in the world's languages. Phonological principles relating to phonemes and allophones, syllables, and word stress are also addressed in preparation for further advanced study in phonological theory.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: demonstrate a coherent and advanced knowledge of the principles and concepts within the field of taxonomic phonetics

ULO2: use advanced technical skills in the analysis, evaluation and transformation of

phonetic data

ULO3: communicate how standard methodologies, integral to advanced analysis in selected areas of phonetics, provide solutions to complex problems in linguistic analysis

ULO4: demonstrate the ability to apply accumulated phonetic knowledge and skills in novel contexts

Assessment Tasks

Coronavirus (COVID-19) Update
