Unit description
Sydney is one of the world's most diverse and globalised cities. In this unit you will be introduced to both the classical sociological literature on the urban way of life and more recent critiques of the global metropolis. We will then explore the burgeoning literature on globalisation and cities through a class-based primary research project. This project will be designed in consultation with a Sydney-based organisation or community group. These projects will be led by the Sociology department staff with expertise in many of the most important and pressing questions in contemporary society: for example, inequality, multi-culturalism, housing, mobility, social movements & social change. You will conduct research in a team led by a staff member, but your contributions to the project will be individually assessed. Over the semester, you will gain practical skills in research methods and will contribute to a project with 'real-world' outcomes. You will be involved in all phases of a research project: scoping and planning, conducting a literature review, preparing a research proposal, ethical conduct of research, and presentation of results to partners and peers.

# Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1:** identify the approaches to metropolitan life associated with classical social theorists and the urban ethnographic tradition it established; as well as recent developments in urban studies

**ULO2:** observe and reflect upon urban practices, through classroom learning, group research exercises and independent reading/study complemented by field trips

**ULO3:** reflect upon the realities of global urban living that they regularly confront, and evaluate the tools of analysis that may best enable them to critically evaluate these processes. (NB: This will include epistemological reflection upon how we might best 'know' contemporary cities and how we might best record urban experience);

**ULO4:** diagnose the elements of global cities as involving both cultural meanings (symbols, images, values) and urban infrastructure (housing, public space, transport, collective goods such as education, etc); and to be able to see how 'urban experience' is shaped by these two sets of factors;

**ULO5:** demonstrate a level of research, reflection and writing appropriate for a third-year sociology student, and explore topics in urban sociology they could pursue in more advanced levels of study.
