Unit description This unit develops a conceptual framework to apply modern investment theory. Students analyse the investment industry, the risk-return relation, asset allocation between risky and risk-free assets, how optimal portfolios are constructed and why they are constructed the way they are. The unit also provides insights in terms of models that explain the cross-section of stock returns, articulating and considering the market efficiency debate, differences between behavioural finance and rational expectations, bond portfolio management, and portfolio insurance techniques. The unit concludes by examining portfolio performance measurement as the final step in the investment process.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Identify and evaluate conceptual frameworks and theories in managing investments.

ULO2: Develop financial literacy and apply knowledge to evaluate and assess investment portfolio performance.

ULO3: Assess and synthesise the differences between behavioural finance and rational expectations in a global investment environment.

Assessment Tasks

Coronavirus (COVID-19) Update

Assessment details are no longer provided here as a result of changes due to the Coronavirus (COVID-19) pandemic.

Students should consult [iLearn](#) for revised unit information.

[Find out more about the Coronavirus \(COVID-19\) and potential impacts on staff and students](#)

General Assessment Information

Consultation: Teacher consultation times will be posted to iLearn.

Questions: Subject-related questions whose answer is useful to everyone should be posted to the iLearn discussion board. Questions of a personal nature can be sent to your teacher.

Extensions:

No extensions will be granted to your assessments. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late (for example, 25 hours late in submission – 20% penalty). This penalty does not apply for cases in which an application for special consideration is made and approved. No submission will be accepted after solutions have been posted.

Marks in gradebook: It is the responsibility of students to view their marks for each within-session-assessment on iLearn within 20 days of posting. If there are any discrepancies, students must contact the unit convenor immediately. Failure to do so will mean that queries received after the release of final results regarding assessment tasks (not including the final exam mark) will not be addressed.
