Unit description In this unit students will develop their understanding of global challenges by undertaking a large scale project applying Science and Technology to a significant real world problem. Students will work in groups at developing innovative and practical solutions to their chosen problem. Problems will be chosen from across the spectrum of challenges facing modern society, such as sustainable development, climate change, resource management, data security, health and global decision making. The group project will enable students to continue developing their skills in leadership, communication, entrepreneurial practice, reflection and leadership.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Analyse a complex global problem and propose a solution to an aspect or instance of that problem.

ULO2: Apply core knowledge from their discipline to the solution of a real world problem.

ULO3: Plan a major project, including the design of necessary processes, information management and records keeping.

ULO4: Communicate about science and technology, in the context of global challenges, to a variety of audiences.

ULO5: Work effectively, constructively and safely, as an individual and as part of a team, applying knowledge of ethical principles and professional conduct.
