Unit description

This unit is designed as an introduction to the technical dimensions of educational assessment, measurement, and evaluation. The aim of this unit is to equip teachers and higher education academics with assessment, measurement, and evaluative skills in order to meet the ever increasing demands on teachers and lecturers to use assessment data to enhance learning. Educators today are expected to collect, compile, and analyse assessment data in order to inform teaching, to facilitate the planning of syllabuses, and to evaluate programs of work. In order to meet these needs, this unit introduces the fundamental principles of assessment, the basic mathematics of educational measurement, and models of learning program evaluation.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Apply knowledge of the technical dimensions of assessment to evaluate assessment tasks and strategies.

ULO2: Critically appraise and apply the mathematics of educational measurement to interpret and report learner performance on a variety of classroom assessments, state and national tests and large-scale standardised assessment programs.

ULO3: Identify various sources of educational data and examine techniques for analysing and interpreting qualitative and quantitative data.

ULO4: Utilise current theoretical models of educational evaluation to strategically plan, facilitate and critically assess school learning programs using a variety of educational data.
