Unit description

This unit examines the purpose, framework and environment influencing and affecting financial reports from the perspective of an incorporated entity. It specifically surveys accounting treatments as required by the International Financial Reporting Standards (IFRS), and its Australian Accounting Standards (AASB), for particular transactions and events. This unit also introduces students to the key business processes and the risks and controls associated with applying these accounting rules to/in financial reports. By the end of the unit, students will be familiar with accounting standards, be able to apply relevant accounting standards to key business processes, prepare and interpret financial reports and examine the outcomes of particular accounting treatment(s) to financial reports. Critical, analytical and integrative thinking, research, problem-solving and professional writing skills are also developed through the Business Research Report which requires students to research, review and recommend relevant accounting treatments.
