Unit description

In Individual Research Project A (Option #1), students will have identified and analysed, in depth, an industry issue. In this unit students will use problem solving research skills to resolve the issue(s) identified. The research skills can draw on quantitative or statistical techniques, qualitative techniques such as surveys, clinical methods such as case studies or analytical techniques. The research project requires a student to apply research skills, and creative problem solving skills, and consider the industry relevance of selected methods. Prior to commencing the research paper students should have an agreed Supervisor, and a work plan approved by the student's Supervisor. Enrolment in this unit is subject to approval by the Program Director for the Master of Applied Finance. This Research Paper is an alternative to a course-work elective.

## General Assessment Information

### General Unit Information

To enrol in the research project, students must have successfully completed AFCP8065 Individual Research Project A (Option #1 only). Your work in this pre-requisite unit should be used as the basis for developing the research topic and work plan for this unit. Prior to enrolling in this unit, students must have an agreed Supervisor, and an approved research topic and work plan.

Based on the nature of the project, a prospective supervisor(s) may be appointed, and specifications for the research project can be agreed. Only once a prospective Supervisor has agreed to a relevant research proposal can a student enrol in the subject.

Resources to assist in the preparation of the proposal are available on the unit iLearn site. Interested students should ask the relevant stream co-ordinator to arrange for access to the site.

### Summary of Assessment Tasks

#### Research Proposal (10%)

Due: **Prior to term of project start**

The Research Proposal should clearly describe the research project and objectives, how it builds

on the work in Research Project A, and how it will achieve the stated learning outcomes for the unit. The proposal should demonstrate that the project is feasible, and include a schedule for completion of the project, and any resources, data, software or other material which are required to complete the project in the required time frame.

Students can refer to the iLearn site, which has links to the following article which may be of assistance in preparing a Research Proposal:

Robert, W. Faff, "A Simple template for pitching research", Accounting and Finance, 55 (2015), 311 – 336.

**Due Date:** To be submitted one month prior to commencement of term in which Research Project will be undertaken (unless otherwise agreed).

**Submission Method:** Online via Turnitin on unit iLearn site.

**Length:** 500 words.

**Extension Requests:**

Students who do not submit this task by the due date and time receive a result of zero. This penalty does not apply when an application for Special Consideration has been made and approved.

Further information on submitting an Application for Special Consideration can be found at <http://students.mq.edu.au/study/my-study-program/special-consideration>.

**Progress Report (10%)**

**Due:** As agreed with Supervisor(s)

The Progress Report should be in a form agreed with the Supervisor(s) at the commencement of the project. It should particularly identify any issues which may impact on the timely completion of the project.
