Unit description This unit is designed to give students a comprehensive understanding of the sustainability challenges facing organisations, and to highlight business risks and opportunities that are emerging as a consequence of global environmental change. Furthermore, the unit is designed to enable students to challenge the status quo of "business-as-usual" and to search for innovative solutions to some of the pressing issues impacting organisations, including changes in ecological parameters through climate change, more frequent and/or severe extreme weather events and natural resource scarcity. The unit seeks to use frame-breaking approaches to problem solving and the development of organisational strategies.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

- ULO1:** Explain the range of challenges organisations are facing resulting from changing environmental conditions.
- ULO2:** Critically evaluate the strengths and limitations of policy development related to sustainability and climate change.
- ULO3:** Consider the rational and process for undertaking a greenhouse gas/carbon emission and energy audit.
- ULO4:** Use a framework to help identify the innovation and response needs of an

organisation.

ULO5: Work productively in a group to prepare and present a research project.

General Assessment Information

Assessment criteria for all assessment tasks will be provided on the unit iLearn site.

It is the responsibility of students to view their marks for each within-session-assessment on iLearn within 20 days of posting. If there are any discrepancies, students must contact the unit convenor immediately. Failure to do so will mean that queries received after the release of final results regarding assessment tasks (not including the final exam mark) will not be addressed.

Late submissions and extensions

Tasks 10% or less – No extensions will be granted. Students who have not submitted the task prior to the deadline will be awarded a mark of 0 for the task, except for cases in which an application for special consideration is made and approved.

Tasks above 10% - No extensions will be granted. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late (for example, 25 hours late in submission – 20% penalty). This penalty does not apply for cases in which an application for special consideration is made and approved. No submission will be accepted after solutions have been posted.

Assessment Tasks

Name	Weighting	Hurdle	Due
<u>Group Presentation and Reflective Writing</u>	40%	No	Week 11

Indicative Time on Task ²: 25 hours

Due: **Week 11**

Weighting: **40%**

Students will form groups to work on a research project and produce a group report (15%), an individual presentation (10%) and an individual reflective writing piece (15%).

On successful completion you will be able to:

- Explain the range of challenges organisations are facing resulting from changing environmental conditions.

- Critically evaluate the strengths and limitations of policy development related to sustainability and climate change.
- Consider the rationale and process for undertaking a greenhouse gas/carbon emission and energy audit.
- Use a framework to help identify the innovation and response needs of an organisation.
- Work productively in a group to prepare and present a research project.

Individual Research Report

Assessment Type ¹: Report

Indicative Time on Task ²: 30 hours

Due: **Week 13**

Weighting: **60%**

Students will undertake research on an agreed topic and produce a research report. The report should not exceed 3,500 words.

On successful completion you will be able to:

- Explain the range of challenges organisations are facing resulting from changing environmental conditions.
- Critically evaluate the strengths and limitations of policy development related to sustainability and climate change.
- Consider the rationale and process for undertaking a greenhouse gas/carbon emission and energy audit.
- Use a framework to help identify the innovation and response needs of an organisation.

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the [Writing Centre](#) for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Teaching is delivered by weekly lecturers.

Reading materials will be provided on iLearn.
