Unit description

In today's changing marketplace, with firms facing intense competition and changing customer demands, firms need to scan the market for business opportunities. Orchestrating the right combination of strategies for expansion, extension, and diversification, as well as choosing the right business environment to compete in, are important to achieve organisational goals. This unit develops practical competencies to create and sustain superior performance in the market through marketing strategy. It focuses on two crucial issues in marketing strategy: identifying target markets and creating differential advantages. The unit equips students with practical skills to develop marketing within firms as a strategic force rather than just as an operational department.
