Unit description
Around the world and across time, human cultural variation has extended into the depths of the human psyche, shaping different ways of being human. Are we all the same or do the ways we treat emotion, conflict, social interaction, cognition, and other dimensions of life result in differences among people? Psychological anthropology has traditionally focused on such themes, investigating the cultural dimensions of self, personality, cognition, emotion, normalcy and deviance, seeking to understand both the variant and universal features of human emotional, cognitive, and social life. In reading a wide range of historical and contemporary works that point toward a nuanced view of cultural actors and institutions that is neither psychologically reductionistic nor socially determined. Some of the core issues covered include: How does culture "build" people with highly-localised systems of meaning, feeling, and morality? Relationships between culture and subjective experience. How do shared cultural meanings become personalised or "subjectified" by individuals? In what ways does culture shape cognition and feeling? What is the role of language in conditioning cognition? Are there dimensions of subjectivity that exist before, or independent from, cultural shaping? And if so, how do we account for their function in the lifeworlds of social groups?

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Demonstrate mastery of psychological anthropology, analysing and discussing
the literature and central theories related to psychological anthropology and the broader study of cultural practices in their social and cultural contexts.

ULO2: Discover the variety of humanity, including the peculiarity of Western traits, ways we understand ourselves, and social roles.

ULO3: Interrogate ‘human nature’ to better understand the relationship between universal traits and variability.

ULO4: Explore the role of social setting and norms in shaping human development.

ULO5: Actively participate in collegial discussion of anthropological theory.

ULO6: Gain greater understanding of techniques for investigating experience, including ethnography, field research, and comparative approaches.

ULO8: Improve presentation and oral expression skills as well as writing and critical reading skills.

General Assessment Information

Lectures will be delivered online via the Echo36 system, and tutorials will be delivered either face-to-face or online via Zoom (depending on your choices during enrollment). Your Tutorial mark consists of two parts: 1) **active reading and annotation of weekly assigned texts using the Perusall App** (this is referred to in the Unit Guide as "Discussion Guide"). This helps ensure that you are keeping up with readings, and engaging with both the texts and your colleagues in an active and thoughtful manner; 2) **Active participation in the weekly tutorial discussion (either online or in-person)**.

Each of these tutorial activities is worth 10% of your final mark. Combined, they yield the 20% tutorial mark indicated in the Assessments overview.

Detailed information on all aspects of unit delivery (login info for Perusall, instructions for tutorials, etc) are provided in the Unit Handbook pdf available on iLearn.
