Unit description

How do we plan for sustainability in our cities and regions and how can current planning practice facilitate future sustainability? In this unit students will develop an advanced understanding of the social, economic and environmental challenges and opportunities associated with fostering sustainability in cities and urban regions. The unit will explore key processes that facilitate and support sustainability, and their implications for planning. Through engagement with current theory and practice, students will develop and apply skills in planning for sustainability in cities and urban regions.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate understanding of the social, economic and environmental

challenges and opportunities associated with sustainability in cities and urban regions.

ULO2: Critically evaluate strategies and policies for managing and developing sustainable urban regions.

ULO3: Compile and analyse a range of qualitative and quantitative data in support of planning sustainable cities and regions.

ULO4: Apply advanced project management and evaluation skills to sustainability planning.

General Assessment Information

Unless a Special Consideration request has been submitted and approved, (a) a penalty for lateness will apply – two (2) marks out of 100 will be deducted per day for assignments submitted after the due date – and (b) no assignment will be accepted more than seven (7) days (incl. weekends) after the original submission deadline. No late submissions will be accepted for timed assessments – e.g. quizzes, online tests.
