Unit description

The law of contracts is a fundamental area of study for an undergraduate degree in law and serves as the basis for a variety of later core and elective units. This unit equips students with a knowledge of essential doctrinal principles of contract law and the capacity to apply legal problem solving skills to the resolution of contractual disputes. It covers the formation of contracts, the contents and interpretation of contractual terms, the vitiating factors affecting contract formation, the discharge of contractual liabilities and other related issues such as formal requirements, illegality and privity of contract. In addition, the unit conveys an understanding of the main competing philosophies of contract and the practical role of contracts in a broader social and historical context.
