Unit description

This unit examines the law of torts and its operation in context from doctrinal, practical and theoretical perspectives. The unit builds on and extends knowledge and skills gained in previous law units, with particular emphasis on skills of oral and written communication, problem solving, and analysis of primary source material. Torts addresses critical questions about social responsibility and obligations members of a community owe to one other, and how civil legal standards can and should be used to encourage appropriate behaviour and rectify wrongs. Negligence is the principal focus; other topics studied include intentional torts, nuisance and different types of liability.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Describe the fundamental doctrines and sources (both common law and statute) for different types of torts and categories of liability

ULO2: Critically analyse the current state of tort law including law reform proposals and comparative developments in other jurisdictions.

ULO3: Apply tort law to complex problems using appropriate legal problem-solving techniques.

ULO4: Analyse the elements and categories of negligence and determine possible defences to a negligence action

ULO5: Identify and analyse the legal components of selected property torts including nuisance, trespass to land and chattels, conversion and intentional torts to the person.

General Assessment Information

Applications for Special Consideration are made electronically via ask.mq.edu.au and should be accompanied by supporting documentation. Students should refer to the Special Consideration policy for complete details of the policy and a description of the supporting documentation required.

Word limits will be strictly applied and work above the word limit will not be marked. All assessments in the unit are to be submitted electronically. Plagiarism detection software is used in this unit.

Detailed marking rubrics will be made available on iLearn. Markers in this unit undertake a process of 'blind marking' to establish a common marking standard and all Fail papers are double marked. Marks are subject to moderation for the purposes of marking consistency and quality standards.

Changes from Previous Offering

An update was made to the assessment task to do away with class participation marks.

The marks for class participation has been added to the hypothetical task to bring it at par with the essay task.

In addition the mode of delivery will include a combination of face to face and online tutorials to take account of the gradual return to campus-based teaching.
