Unit description

This unit will cover theoretical models of the development of psychopathology, as well as evidence-based assessment of adult and child mental disorders such as externalising and internalising disorders, complex disorders such as bipolar disorders, psychotic disorders, and personality disorders. Methods for differential diagnosis as well as treatment planning for comorbidity will be covered. Assessment techniques for these disorders in children and adults will include interviewing children, adolescents and their families, as well as acutely unwell clients (e.g. psychotic). It will also involve knowledge of self-report measures, child, parent and teacher rating scales and use of behavioural observations where appropriate.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:
