Unit description

This unit provides students with an opportunity to engage with the business community on a variety of contemporary business issues and challenges in an international business (IB) context. The unit requires students to complete two major projects prescribed by industry partners. Students will apply knowledge of international business to real-world IB projects. By the end of the unit, students gain practical knowledge and experience of how to research and analyse real-world international business issues and challenges and develop a deep understanding of how the academic knowledge covered in previous units (particularly MGMT1005, MGMT2002, MGMT3001) can be integrated to tackle real-world IB projects.

Delivery Format and Other Details	<p>The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/</p> <ul style="list-style-type: none"> • This unit includes an individual project and a group-based project as part of the PACE program. It requires students to integrate the materials covered in previous years' International Business units and apply them to international business problems as presented by the Client Partners. Its objectives are to investigate what kind of factors influence the international business strategies within an organisation to work towards achieving a competitive advantage. • The classes are conducted through a series of seminars (i.e. lectures) by industry speakers, mentoring and reflection workshops (i.e. tutorials) where students discuss and reflect upon what they have learned in the industry seminars, and mini-conferences where students showcase and present their projects around the Client Partners' specified international business problem/s. Throughout the unit, the emphasis is on the analytical process: identifying information needs, acquiring the necessary information, interpreting it and using it as the basis for developing business recommendations or solutions for the Client Partners. • Number and length of classes: 1 x 2 hour Seminar and Conference series and 1 x 1 hour Mentoring and Reflection series - tutorial, i.e. 3 hours face to face per week unless indicated otherwise in the lecture schedule. Classes may vary due to public holiday(s) • In Seminar series, speakers from participating companies will deliver their talks and/or prescribe a set of real world business issues, problems and challenges for students to develop their group and individual research projects. • In Conference series, selected students (individual and/or group) will showcase their projects through inlecture presentations (individual and/or group). Invited speakers will listen to students presentations and offer feedback and suggestions. These showcase presentations will allow client partners from diverse business sectors to converse with and engage specific students, and to potentially recruit them for either volunteer roles, mentoring programs, or formal employment. Students will benefit from building their collaborative relationships with client companies to gain further professional mentoring and to enhance their employmentseeking efforts. • Mentoring and Reflection series (i.e. tutorials) is where students reflect on what they have learned in the Seminar and Conference series by linking guest speakers' talks with knowledge and skills learned in previous units
