Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Notice
Some on-campus classes have moved online for the first two weeks of Session, before returning to campus in Week 3. If you are studying a unit outside of the primary Session 2 timetable, please contact your teaching staff team for further details.

Some classes/teaching activities cannot be moved online and must be taught on campus. To find out if you are enrolled in one of these classes/teaching activities, you can check to see if your unit is on the list of units with mandatory on-campus classes/teaching activities.

Your Unit Convenor will provide more information via an iLearn announcement when your iLearn unit becomes available.

Unit description
This unit aims to provide an understanding of the concepts, architectures, design tools and methods for developing System-on-Chip (SoC) solutions. The unit culminates in a project where students develop a SoC solution from high-level functional specifications through to design, implementation and testing on real hardware using industry standard hardware description and software programming languages and tools.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Articulate a mature knowledge of what a System-on-Chip system is, and its constituent components.
ULO2: Investigate, document, and convey issues in hardware/software interface design.
ULO3: Work within the constraints imposed by the availability of resources on the System-on-Chip platform to produce designs that meet user requirements.
ULO4: Design and test System-on-Chip solutions on real hardware using standard
hardware description and software programming languages.

ULO5: Prepare design documents and reports and communicate and explain design decisions.

**General Assessment Information**

There is one assignment, one quiz, and one design project for this course. Assessment of the assignment is through a written submission. The quiz will be conducted through iLearn. Assessment of the project is through a written report, demonstration and oral defense. They will be due according to the given schedule. Late submission of written assessment tasks will attract a penalty of 20% of marks per day. No late attempts of the quiz will be accepted. Extenuating circumstances will be considered upon lodgment of an application for special consideration. Resubmissions of work are not allowed.

In order to pass this unit, a student must obtain a mark of 50 or more for the unit (i.e. obtain a passing grade P/ CR/ D/ HD).

For further details about grading, please refer to the policies and procedures section.

**Assignment Report**

Assessment Type 1: Report
Indicative Time on Task 2: 20 hours
Due: Week 7
Weighting: 20%

Assignment Report (1000 word equivalent)

On successful completion you will be able to:

- Articulate a mature knowledge of what a System-on-Chip system is, and its constituent components.
• Investigate, document, and convey issues in hardware/software interface design.
• Work within the constraints imposed by the availability of resources on the System-on-Chip platform to produce designs that meet user requirements.
• Design and test System-on-Chip solutions on real hardware using standard hardware description and software programming languages.
• Prepare design documents and reports and communicate and explain design decisions.

Quiz
Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 5 hours
Due: Week 8
Weighting: 20%

Quiz during session

On successful completion you will be able to:
• Articulate a mature knowledge of what a System-on-Chip system is, and its constituent components.

Project Report
Assessment Type 1: Report
Indicative Time on Task 2: 50 hours
Due: Week 11
Weighting: 20%

Project Report (2000-word equivalent)

On successful completion you will be able to:
• Investigate, document, and convey issues in hardware/software interface design.
• Work within the constraints imposed by the availability of resources on the System-on-Chip platform to produce designs that meet user requirements.
• Prepare design documents and reports and communicate and explain design decisions.

Project Defense and Demonstration
Assessment Type 1: Viva/oral examination
Indicative Time on Task: 10 hours  
Due: Week 12  
Weighting: 40%

Project Defense and Demonstration

On successful completion you will be able to:

- Articulate a mature knowledge of what a System-on-Chip system is, and its constituent components.
- Investigate, document, and convey issues in hardware/software interface design.
- Work within the constraints imposed by the availability of resources on the System-on-Chip platform to produce designs that meet user requirements.
- Design and test System-on-Chip solutions on real hardware using standard hardware description and software programming languages.
- Prepare design documents and reports and communicate and explain design decisions.

1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

In this course, you will be using Vivado SDSoC to program the Ultra96 development board for your labs and project. Access to Vivado SDSoC and the Ultra96 will be available during the weekly lectorial time on campus. A Virtualbox VM image with Vivado SDSoC will also be provided to students so that they can work on the assignment and project at home. However, to run the VM image well, students should ensure they have access to a computer/laptop with at least 16 GB of RAM and ~70 GB of free hard drive space.

Additional learning resources will be provided through the course’s iLearn page.

Unit Schedule

Refer to iLearn for unit schedule
Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy (Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)

Students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to help you improve your marks and take control of your study.
Getting help with your assignment
Workshops
StudyWise
Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

Subject and Research Guides
Ask a Librarian

Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au
If you are a Global MBA student contact globalmba.support@mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.
When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy.
The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering
This is a new unit offering.
