Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Notice
As part of Phase 3 of our return to campus plan, most units will now run tutorials, seminars and other small group learning activities on campus for the second half-year, while keeping an online version available for those students unable to return or those who choose to continue their studies online.

To check the availability of face to face activities for your unit, please go to timetable viewer. To check detailed information on unit assessments visit your unit's iLearn space or consult your unit convener.
General Information

Credit points
10

Prerequisites
(100cp at 1000 level or above) including (ENVE216 or ENVS216 or ENVS2116 or GEOS216 or ENVS2115 or ENVS214 or ENVE214 or GEOS251)

Corequisites

Co-badged status
Unit description
Our oceans regulate and drive climate change, whilst the coastal and shelf environments experience some of the greatest impacts of climate change. This unit provides students with a comprehensive understanding of these interactions and impacts on a range of scales (ocean basin to regional coast) and time scales (past millennia to future decades). The unit is taught in three modules:

Module 1 – Marine Climate Change: Past and Future Long-Term Changes in Marine Climate and Coastal Dynamics. The module covers sea-surface temperature, precipitation, ocean currents, extreme maritime storms. Seasonal, annual, decadal and centennial modes of ocean-atmosphere variability and predictability, evidence-based and modelling approaches to sea surface temperature, salinity and sea-level rise, including coastal morpho-dynamic responses.

Module 2 - Coastal Oceanography covers continental shelf currents, coastal winds, wave transformation, sea-level variability, shoreface and surf zone processes, estuarine processes, storm surges, coastal flooding and sea-level rise.

Module 3 – Implications for coastal zone planning and management. Pollution control, management of shoreline erosion, policy and legislative approaches to marine estate and coastal zone management in New South Wales.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

Learning Outcomes
On successful completion of this unit, you will be able to:

- **ULO1**: Interpret marine and coastal climate change using the archive of paleoclimate data, instrumental observations and modelled projections
- **ULO2**: Analyse the modes of coastal evolution and climate variability, on decadal to millennial timescales, as a basis for interpreting modern trends and events in coastal configuration and morphology
- **ULO3**: Evaluate the mechanisms of sea-level change, impacts on regional coasts and adaptation measures
- **ULO4**: Develop cogent management solutions to pressing coastal environmental problems, based on relevant data and models

General Assessment Information
GENERAL ASSESSMENT CRITERIA

https://unitguides.mq.edu.au/unit_offerings/129902/unit_guide/print
Assessment Criteria

Assessment at Macquarie University is standards-based, as outlined in the Assessment Policy. This means that your work will be assessed against clear criteria, and these criteria (e.g. in a rubric) will be made available when the assessment tasks are released to you on iLearn.

Submission of Assessments

All assessments must be submitted online through Turnitin unless otherwise indicated. Links for the submission of each assessment will be available on iLearn.

You should always check that you have uploaded the correct file. If you have a problem, please email the Unit Convenor with your correct file. You must also keep a copy of your assessments until the end of semester in case there is a problem with your submission. It is your responsibility to ensure that you can provide a copy of your assessment if requested.

Marking of Assessments

Assignments will usually be marked through Turnitin with grades provided through Gradebook on iLearn. Please do not submit your assessments via email or in hard copy unless requested (e.g. a sketch or drawing).

We aim to return your assessment grades and feedback within two to three weeks of the date that you submitted it. We appreciate your patience and will advise you through iLearn when your marked assessments and feedback are available for viewing.

Penalties for Late Assessments

The penalty for late submission of assessments in this unit is ten percent (10 %) of the assessment value per day, calculated from the due time and date. This means that if the assignment is worth a total of 30 marks (or 30 % of the unit) you will lose 3 marks for each day it is late. This is a hefty penalty designed to make you aware of the importance of organising yourself around assessment due dates. The penalty will be applied over weekdays and weekends unless you have been granted an extension prior to the due date.

Extensions for Assessments

To obtain an extension for an assessment task, you will need to follow the formal process as outlined in the Special Consideration Policy, and you must provide appropriate supporting evidence (e.g. medical certificate - see advice for Special Consideration requests). The final decision regarding the granting of an extension lies with the unit convenor. Permission for extensions must be sought before the due date unless there are exceptional circumstances. Please let us know of problems in advance or as soon as possible, not after the event. We are likely to be much more sympathetic and able to accommodate your circumstance if you follow this advice.

Exams

Details of exam conditions and timetables can be found on the Exams and Results portal. The draft exam timetable will be released approximately eight weeks before the commencement of the exams. The final exam timetable will be published 4 weeks before commencement. All students (including exchange students) are expected to present themselves for the exam at the
Assessment Tasks

SGTA Reports
Assessment Type 1: Report
Indicative Time on Task 2: 25 hours
Due: **Friday following the practical class**
Weighting: **40%**

Assessment 1 requires the submission of computer-based SGTA reports. The content of each report will include analyses and interpretation of SGTA activities.

On successful completion you will be able to:
- Interpret marine and coastal climate change using the archive of paleoclimate data, instrumental observations and modelled projections
- Analyse the modes of coastal evolution and climate variability, on decadal to millennial timescales, as a basis for interpreting modern trends and events in coastal configuration and morphology
- Evaluate the mechanisms of sea-level change, impacts on regional coasts and adaptation measures

Research Assignment
Assessment Type 1: Literature review
Assessment 2 is a literature review and synthesis that draws together themes from the three modules in the unit.

On successful completion you will be able to:

- Interpret marine and coastal climate change using the archive of paleoclimate data, instrumental observations and modelled projections
- Analyse the modes of coastal evolution and climate variability, on decadal to millennial timescales, as a basis for interpreting modern trends and events in coastal configuration and morphology
- Evaluate the mechanisms of sea-level change, impacts on regional coasts and adaptation measures
- Develop cogent management solutions to pressing coastal environmental problems, based on relevant data and models

Final Examination

Final examination covering all lecture and SGTA material.

On successful completion you will be able to:

- Interpret marine and coastal climate change using the archive of paleoclimate data, instrumental observations and modelled projections
- Analyse the modes of coastal evolution and climate variability, on decadal to millennial timescales, as a basis for interpreting modern trends and events in coastal configuration and morphology
- Evaluate the mechanisms of sea-level change, impacts on regional coasts and adaptation measures
• Develop cogent management solutions to pressing coastal environmental problems, based on relevant data and models

1 If you need help with your assignment, please contact:
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Unit iLearn

This unit has an iLearn page that can be accessed through ilearn.mq.edu.au. It contains important information and other materials relating to the unit, including details and links for assessments.

Communication

The unit iLearn is the primary way that we communicate with you. Please check it regularly for announcements and posts. You are encouraged to use the Discussion Board on iLearn to post questions and generate discussion with other students. Please only email the convenor with private matters – all other questions should be posted on iLearn.

Unit Organisation

This unit is delivered in (modules/weekly topics). The organisation of these is outlined in a detailed unit schedule which is available on iLearn.

Classes

The class timetable for this unit can be found through the Timetable portal. You should also check the unit schedule as some weeks may have other instructions or locations.

Workload

The expected workload for this 10-credit point unit is 150 hours of activity, comprising lecture attendance and review, practical class attendance and report completion, research towards the completion of the written assignment, attendance of the field day, and exam preparation.

Requirements to complete this unit satisfactorily

To complete this unit satisfactorily, you must:

1. Participate in all scheduled classes;

2. Complete all assessments and the final exam; and
3. Achieve a pass grade or higher.

The descriptions for grades common to all coursework units offered by Macquarie University are outlined in **Schedule 1 of the Assessment Policy**.

**Recommended Texts and/or Materials**

Readings will be provided each week on iLearn.

**Technology Used and Required**

This unit will use iLearn and Echo360. See the [Instructions on how to log in to iLearn](https://unitguides.mq.edu.au/unit_offerings/129902/unit_guide/print) and the [iLearn quick guides for students](https://unitguides.mq.edu.au/unit_offerings/129902/unit_guide/print) which will help you:

- **Getting started** - Find out how to navigate and familiarise yourself with the iLearn environment.
- **Activities** - Learn how to effectively complete the activities required of you in iLearn.
- **Assignments and Gradebook** - Find out how to submit assessments and view your grades using iLearn.
- **Online study tips** - Studying online is a unique experience, learn how to navigate it here.
- **Discussion forums** - Explore the different types, and features of discussion forums in iLearn.
- **Lecture recordings** - Find out how to access lectures online, as well as the features available to you.

## Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
**Unit guide** ENVS3101 Marine Climate, Weather and Coastal Oceanography

- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy *(Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)*

Students seeking more policy resources can visit the [Student Policy Gateway](https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/study/getting-started/student-conduct](https://students.mq.edu.au/study/getting-started/student-conduct)

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](https://ask.mq.edu.au) or if you are a Global MBA student contact [globalmba.support@mq.edu.au](mailto:globalmba.support@mq.edu.au)

**Student Support**

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

**Learning Skills**

Learning Skills ([mq.edu.au/learningskills](http://mq.edu.au/learningskills)) provides academic writing resources and study strategies to help you improve your marks and take control of your study.

- Getting help with your assignment
- Workshops
- StudyWise
- Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- [Subject and Research Guides](http://mq.edu.au/learningskills)
- [Ask a Librarian](http://mq.edu.au/learningskills)
Student Enquiry Service
For all student enquiries, visit Student Connect at ask.mq.edu.au
If you are a Global MBA student contact globalmba.support@mq.edu.au

Equity Support
Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
