PHIX2026
The Ethics and Moral Psychology of Good and Evil
Session 1, Fully online/virtual 2021
Department of Philosophy
Reflecting on what motivates morality presents vital inquiries about the role played by reason, will, emotion, and intuition in fostering moral behavior. It also provides a basis for critically assessing prominent ethical theories to determine how well they can accommodate the lived experiences of human agency and motivations. Additionally, it invites further questions about the role of social context and psychopathic conditions in explaining everyday and extreme forms of wrongdoing. This unit will meticulously explore the philosophical and psychological literature on moral agency, virtue, goodness, and evil, as well as examining historical and contemporary ethical discourses on the significance of things such as integrity, character, autonomy, and respect for others in moral life and moral interactions.
