Unit description

Are you satisfied with your professional career? Where do you see yourself in the near or even distant future? No matter where you are on your professional journey, everyone can benefit from some planning. This course will help you adapt to these changes successfully by enabling you to enhance your self-knowledge and confidence to explore wider career options and opportunities. In this course you will learn how to create a career development plan to help you reach your professional goals and aspirations. This course will provide you valuable and practical guidance for your career planning and self-management based on evidence-based models of goal setting (self-determination theory and goal setting theory), career adaptability (career construction theory, social cognitive career theory, and job crafting theory), and career success (social capital theory and psychological capital theory). Via structured learning activities (video lectures, quizzes, discussion prompts, industry interviews, and written assessments) you will come to appreciate that career planning and management is an ongoing process of assessing one's career identity, setting new learning goals, creating new career vision and goals, developing effective career strategies, and celebrating accomplishments as one develops and becomes more skilled.
