Session 2 Learning and Teaching Update

The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of units with mandatory on-campus classes/teaching activities.

Visit the MQ COVID-19 information page for more detail.

Unit description
The ability to generate strategic insights is an expectation for the "future of work" but what does this actually mean? Are there universal principles of strategic thinking that can help us become more effective at developing insights? And how can these strategic insights help an organisation become more competitive? This unit examines the basic elements of strategy through a set of rich and nuanced business models. It covers classic strategic questions and topics with an emphasis on diverse and emergent themes, such as open innovation and strategy, networks, platforms and other business model innovations, and the processes and practices of strategy, and their effects. Students apply the tools and techniques of contemporary strategic analysis and also reflect on the doing of strategy in the context of their own business or workplace, and other real cases. In parallel, students are encouraged to develop a reflective and critical perspective on the implications and impacts of taken-for-granted strategy thinking, concepts and tools, and conversely are asked to consider the future of strategy, centred on how strategic management can provide solutions for pressing sustainability-related societal-level challenges.
