Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Notice
As part of Phase 3 of our return to campus plan, most units will now run tutorials, seminars and other small group activities on campus, and most will keep an online version available to those students unable to return or those who choose to continue their studies online.

To check the availability of face-to-face activities for your unit, please go to timetable viewer. To check detailed information on unit assessments visit your unit’s iLearn space or consult your unit convenor.
## General Information

- **Credit points**: 10

- **Prerequisites**: (130cp at 1000 level or above) including (GEOS216 or ENVE216 or ENVS216 or ENVS2116 or EESC2160)

- **Corequisites**: 

- **Co-badged status**: 

- **Unit description**: More than half of the world's population lives in urban areas, and virtually all countries are becoming increasingly urbanised. Australia is one of the most urbanised countries in the world, with about 90% of our pollution living in urban areas. For these reasons, urban climate and air quality are extremely important, directly influencing the health and wellbeing of billions of people around the world. This unit explores urban climate and air quality through detailed study of interactions between the atmosphere and the Earth's surface in the relatively thin veneer of air that we live in known as the planetary boundary layer. The unit will be of interest to all students in science and engineering and more generally any student with an interest in the environment, and provides knowledge and skills that will be of value for a range of careers and employers, ranging from environmental consultancy and local and state government, to private industry.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

## Learning Outcomes

On successful completion of this unit, you will be able to:
ULO1: describe urban climate and air quality, including the physical, chemical and biological processes operating to produce or change the state of the urban atmosphere.

ULO2: demonstrate knowledge and conceptual understanding of the dispersive capabilities of the atmospheric environment near the surface of the earth, how pollutants emitted into the atmospheric environment move and interact with the surface.

ULO3: examine and integrate scientific information from various primary and secondary sources.

ULO4: apply practical knowledge to undertake analysis of climate and air quality data.

ULO5: demonstrate practical laboratory and field based skills associated with typical measurement problems in the field of climate science.

**General Assessment Information**

Details of the Literature Review and Scientific Report assessments will be provided in Weeks 1 and 8 respectively.

The Literature Review and Scientific Report assessments must be submitted via Turnitin (a link will be provided on the iLearn web site for the unit).

Quizzes 1-4 will be completed in iLearn.

Late assessment submissions are permitted and the penalty to be applied to late submissions will be 10% of the assessment value per day (e.g., an assessment weighted at 20% will be penalised at 2% per day).

Extension requests should be directed to the Unit Convenor.

**Assessment Tasks**

</table>

**Scientific report**

Assessment Type: Report
Indicative Time on Task: 20 hours
Due: Friday 28 May 2021
Weighting: 20%
Scientific report of urban climate and air quality topic.

On successful completion you will be able to:

• describe urban climate and air quality, including the physical, chemical and biological processes operating to produce or change the state of the urban atmosphere.

• apply practical knowledge to undertake analysis of climate and air quality data.

Literature review

Assessment Type 1: Literature review
Indicative Time on Task 2: 19 hours
Due: Thursday 1 April 2021
Weighting: 20%

On successful completion you will be able to:

• describe urban climate and air quality, including the physical, chemical and biological processes operating to produce or change the state of the urban atmosphere.

• examine and integrate scientific information from various primary and secondary sources.

Quizzes

Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 20 hours
Due: Quiz1: Week 4; Quiz2: Week 8; Quiz3: Week 10; Quiz4: Week 13
Weighting: 60%

Four quizzes throughout the session.

On successful completion you will be able to:

• describe urban climate and air quality, including the physical, chemical and biological processes operating to produce or change the state of the urban atmosphere.

• demonstrate knowledge and conceptual understanding of the dispersive capabilities of the atmospheric environment near the surface of the earth, how pollutants emitted into the atmospheric environment move and interact with the surface.

• examine and integrate scientific information from various primary and secondary sources.

• apply practical knowledge to undertake analysis of climate and air quality data.

• demonstrate practical laboratory and field based skills associated with typical measurement problems in the field of climate science.
1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

**Delivery and Resources**

**Classes**

There is a two hour Workshop and a three hour Practical for this unit that you are expected to attend each week. See the University Class Timetable for details (https://timetables.mq.edu.au/2021/).

**Required Text**

The required text for this unit is:

The Library provides online access [QC981.7.U7 O34 2017].

Also highly recommended:

**Unit Schedule**

See the iLearn web site for the Unit Schedule.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
Special Consideration Policy (Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)

Students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (http://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to help you improve your marks and take control of your study.

- Getting help with your assignment
- Workshops
- StudyWise
- Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Enquiry Service

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au
Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
