Unit description
This unit is about language teaching and learning and focuses on internal and external social factors which influence both curriculum and classroom practice. The focus of the unit moves from consideration of individuals in a teaching-learning context, through the classroom as a site of learning and generation of a unique discourse, to the influence and impact of broader social and political concerns on curriculum. Factors that bring about and impede change are examined and their impact evaluated across a spectrum of learning environments. The focus is on TESOL but teachers of other languages will also find this unit relevant to their professional practice.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

**ULO1**: Identify the social conditions inside and outside the classroom that define learning contexts and impact on learning, and link these parameters to constraints and opportunities that exist in different contexts.

**ULO3**: Demonstrate understanding of the ways teachers develop beliefs about language learning and teaching and the effect these can have on lesson planning and delivery.
ULO4: Analyse and critically reflect on your own practice as a language teacher and beliefs about language learning

ULO2: Develop a critical understanding of the range of approaches and methods used in TESOL, the principles underlying them and how, together with historical factors, they influence curriculum and syllabus design.

ULO5: Discuss and explore ways to promote ethical and sustainable approaches to TESOL in your professional life.

ULO6: Apply relevant theoretical models to practice in teaching/curriculum design in a specific teaching context, and evaluate their effectiveness.
