Unit description

This unit provides an overview of linguistic and other barriers to communication, as well as interventions to minimise or remove these barriers to full and equitable access to and participation in communication in society at large. The unit will provide an introduction to the concept of accessibility from a range of disciplinary perspectives including second language teaching and learning, translation and interpreting, editing and publishing, intercultural communication, and disability studies. The unit focuses first on the nature of barriers to accessible communication before examining them in detail in specific contexts. Throughout the unit, students are encouraged to explore, research, and reflect on language and communication barriers, and how these can be overcome to facilitate equitable access to and participation in communication.

Important Academic Dates
