However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Session 2 Learning and Teaching Update
The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of units with mandatory on-campus classes/teaching activities.

Visit the MQ COVID-19 information page for more detail.

| Credit points | 10 |

| Prerequisites | (STAT810 or STAT8310 or STAT806) and (ACST881 or ACST8081) |

| Corequisites |  |

| Co-badged status |  |

| Unit description | The topics covered in this unit include: an introduction to stochastic processes; martingales; an introduction to stochastic calculus; Ito’s lemma; forwards, futures, swaps and options; arbitrage-free pricing via replicating portfolio and risk neutral probability measures; the Girsanov theorem; the Black-Scholes option pricing model for European options; the 'Greeks' and dynamic hedging; term structure of interest rates; relations among short rates, forward rates and default-free zero-coupon bonds; interest rate models; firm-value and intensity-based credit risk models; ruin theory; valuation of basic guarantees. Students gaining a credit average in both ACST8087 and ACST8088 (minimum mark of 60 on both units) will satisfy the requirements for exemption from the professional subject CM2 of the Actuaries Institute. |

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

## Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1**: Understand the use of stochastic calculus in modelling security prices and valuation of option pricing approaches
**ULO2**: Demonstrate an understanding of the Black-Scholes option pricing model via both the partial differential equation approach and the risk-neutral pricing approach.

**ULO3**: Describe the use of interest models in term of structure modelling and pricing of zero-coupon bonds.

**ULO4**: Describe the different approaches to modelling credit risk.

**ULO5**: Apply ruin theory to insurance problems.

**ULO6**: Explain various concepts in stochastic calculus in the risk-neutral valuation approach.

### General Assessment Information

#### Late submissions of assignments

Sometimes unavoidable circumstances occur that might prevent you from submitting an assignment on time and, in that case, you may be eligible to lodge a **Special Consideration request**.

Unless a **Special Consideration request** has been submitted and approved, please note that no extensions to assignment deadlines will be granted. Assignments that are submitted late will attract a late penalty:

1. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late.

2. No assignment will be accepted more than 72 hours after the due date and time (incl. weekends) after the original due date.

### Assessment Tasks

### Assignment

Assessment Type 1: Quantitative analysis task  
Indicative Time on Task 2: 20 hours  
**Due**: **29 September 12pm**  
Weighting: **20%**

This is an individual assignment which focuses on problem solving using Excel spreadsheet.
On successful completion you will be able to:

- Understand the use of stochastic calculus in modelling security prices and valuation of option pricing approaches
- Demonstrate an understanding of the Black-Scholes option pricing model via both the partial differential equation approach and the risk-neutral pricing approach.
- Describe the use of interest models in term of structure modelling and pricing of zero-coupon bonds.
- Explain various concepts in stochastic calculus in the risk-neutral valuation approach.

Class Test
Assessment Type: Quiz/Test
Indicative Time on Task: 12 hours
Due: 20 October 3pm
Weighting: 20%

The test will be approximately 90 minutes, to be held during class time.

On successful completion you will be able to:

- Understand the use of stochastic calculus in modelling security prices and valuation of option pricing approaches
- Demonstrate an understanding of the Black-Scholes option pricing model via both the partial differential equation approach and the risk-neutral pricing approach.
- Describe the use of interest models in term of structure modelling and pricing of zero-coupon bonds.
- Explain various concepts in stochastic calculus in the risk-neutral valuation approach.

Final Exam
Assessment Type: Examination
Indicative Time on Task: 28 hours
Due: University Examination Period
Weighting: 60%

The final examination will be closed book, a three-hour written paper with ten minutes reading time, to be held during the University Examination period.
On successful completion you will be able to:

- Understand the use of stochastic calculus in modelling security prices and valuation of option pricing approaches.
- Demonstrate an understanding of the Black-Scholes option pricing model via both the partial differential equation approach and the risk-neutral pricing approach.
- Describe the use of interest models in term of structure modelling and pricing of zero-coupon bonds.
- Describe the different approaches to modelling credit risk.
- Apply ruin theory to insurance problems.

1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation.

Delivery and Resources

Classes

It is intended that learning in this session will be a combination of pre-recorded online lecture and on-campus tutorials. Please refer to iLearn for further details.

Required and Recommended Texts and/or Materials

Required texts

Detailed lecture notes and tutorial exercises are available on the unit's iLearn site.

Recommended Textbooks

- Options, Futures and Other Derivatives (9th edition); John Hull
- An Introduction to the Mathematics of Financial Derivatives (2nd edition); Salih N. Neftci
- Interest Rate Models: An Introduction; Andrew J. G. Cairns
- Insurance Risk and Ruin (2nd edition); David C. M. Dickson

Each copy of these books is available in the Reserve section of the Library and can be purchased from the Macquarie University Co-op bookshops.

Technology Used and Required
Students need to be able to use a computer softwares (such as Excel, R) to analyse financial problems. Although the unit does not aim to teach students how to use these softwares, you are encouraged to make use of spreadsheets and other software packages for the assignment.

**Unit Webpage**

The webpage for this unit can be accessed via the iLearn site at: http://ilearn.mq.edu.au

**Teaching and Learning Strategy**

The unit is taught using two-hour lecture and one-hour tutorial each week. You are expected to read lecture materials in advance of the lectures. The tutorial is an opportunity for you to attempt questions for each section of work, or to ask questions. It is highly recommended to try to solve questions in advance of the tutorials.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy (Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)

Students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the
University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to help you improve your marks and take control of your study.

- Getting help with your assignment
- Workshops
- StudyWise
- Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Enquiry Service

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
