Session 2 Learning and Teaching Update

The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of [units with mandatory on-campus classes/teaching activities](#).

Visit the [MQ COVID-19 information page](#) for more detail.

Unit description

Climate change is the outstanding environmental issue of our time. This is a specialised unit that analyses law and policy relevant to managing the problems presented by climate change. Both the causes and impacts of climate change are pervasive and present significant challenges to conventional legal approaches. The unit investigates the role of law in driving society's response from the international law level through the United Nations Framework Convention on Climate Change and Paris Agreement, to federal and state responses in terms of both legislation and judicial decisions to local scale actions. At each jurisdictional level, focus is given to law that relates to the major pillars of climate policy – mitigation, adaptation and loss and damage.
