Disclaimer

Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Session 2 Learning and Teaching Update

The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of units with mandatory on-campus classes/teaching activities.

Visit the MQ COVID-19 information page for more detail.

General Information

Unit convenor and teaching staff Convenor and Lecturer Hassan Asghar hassan.asghar@mq.edu.au Contact via email Room 210, Level 2, 4 Research Park Drive, Becton-Dickinson (BD) Building email to make appointment

Lecturer Muhammad Ikram <u>muhammad.ikram@mq.edu.au</u> Contact via email Room 286, Level 2, 4 Research Park Drive, Becton-Dickinson (BD) Building email to make appointment email to make appointment

Credit points 10

Prerequisites (COMP6300 or ITEC643) or admission to MInfoTechCyberSec or BCyberSecMInfoTechCyberSec

Corequisites

Co-badged status

Unit description

This unit deals with the concepts, techniques and tools which contribute to enable information and data security. Building on applied cryptography notions and introducing the concept of provable privacy, the unit addresses topics such as encryption, privacy preserving techniques in data mining, content security solutions or secure data management.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Explain the concepts of information security and provable privacy.

ULO2: Perform risk assessment (including privacy risk) on digital information and datasets.

ULO3: Apply adapted security technologies and tools, in particular encryption to enhance security properties of data.

ULO4: Analyse the trends for managing data security.

General Assessment Information

Late Submission

No extensions will be granted without an approved application for Special Consideration. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late. For example, 25 hours late in submission for an assignment worth 10 marks – 20% penalty or 2 marks deducted from the total. No submission will be accepted after solutions have been posted.

Supplementary Exam

If you receive Special Consideration for the final exam, a supplementary exam will be scheduled after the normal exam period, following the release of marks. By making a special consideration application for the final exam you are declaring yourself available for a resit during the supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the policy prior to submitting an application. Approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

Weekly Tasks

There are 10 weekly tasks in this unit (submission of tutorial tasks), one for every week except for the three Module Exam weeks.

Assessment Tasks

Name	Weighting	Hurdle	Due
Weekly Tasks	10%	No	Every Week
Module Exam 1	20%	No	Week 5
Assignment 2	15%	No	Week 7
Module Exam 2	20%	No	Week 9
Assignment 2	15%	No	Week 12
Module Exam 3	20%	No	Week 13

Weekly Tasks

Assessment Type 1: Quiz/Test Indicative Time on Task 2: 10 hours Due: **Every Week** Weighting: **10%**

Each week, a set of exercises will be available online. One or two questions from the exercises will be the weekly quiz task.

On successful completion you will be able to:

- Explain the concepts of information security and provable privacy.
- Perform risk assessment (including privacy risk) on digital information and datasets.
- Apply adapted security technologies and tools, in particular encryption to enhance security properties of data.
- Analyse the trends for managing data security.

Module Exam 1

Assessment Type 1: Examination Indicative Time on Task 2: 15 hours Due: **Week 5** Weighting: **20%**

A 50 minutes long online examination worth 20% that will be held in week 5 (online via iLearn). This will test understanding of material covered in weeks 1 to 4. For on campus offering this will be held during practical classes.

On successful completion you will be able to:

- Explain the concepts of information security and provable privacy.
- Perform risk assessment (including privacy risk) on digital information and datasets.

Assignment 2

Assessment Type 1: Project Indicative Time on Task 2: 10 hours Due: **Week 7** Weighting: **15%** This assignment deals with concepts in provable privacy and risk assessments of datasets and is due on week 7. The assignment is to be submitted via iLearn.

On successful completion you will be able to:

- Explain the concepts of information security and provable privacy.
- Perform risk assessment (including privacy risk) on digital information and datasets.

Module Exam 2

Assessment Type 1: Examination Indicative Time on Task 2: 15 hours Due: **Week 9** Weighting: **20%**

A 50 minutes long online examination worth 20% that will be held in week 9 (online via iLearn). This will test understanding of material covered in weeks 5 to 8. For on campus offering this will be held during practical classes.

On successful completion you will be able to:

- Perform risk assessment (including privacy risk) on digital information and datasets.
- Apply adapted security technologies and tools, in particular encryption to enhance security properties of data.

Assignment 2

Assessment Type 1: Project Indicative Time on Task 2: 10 hours Due: **Week 12** Weighting: **15%**

This assignment deals with identifying privacy risks in datasets and securing access to data and is due on week 12. The assignment is to be submitted via iLearn.

On successful completion you will be able to:

- Explain the concepts of information security and provable privacy.
- Perform risk assessment (including privacy risk) on digital information and datasets.
- Apply adapted security technologies and tools, in particular encryption to enhance security properties of data.
- Analyse the trends for managing data security.

Module Exam 3

Assessment Type 1: Examination Indicative Time on Task 2: 15 hours Due: **Week 13** Weighting: **20%**

A 50 minutes long online examination worth 20% that will be held in week 13 (online via iLearn). This will test understanding of material covered in weeks 9 to 12. For on campus offering this will be held during practical classes.

On successful completion you will be able to:

- Perform risk assessment (including privacy risk) on digital information and datasets.
- Apply adapted security technologies and tools, in particular encryption to enhance security properties of data.
- Analyse the trends for managing data security.

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

COMPUTING FACILITIES

Important! Please note that this is a BYOD (Bring Your Own Device) unit. You will be expected to bring your own laptop computer (Windows, Mac or Linux), install and configure the required software.

CLASSES

Each week you should complete any assigned readings and review the lecture slides in order to prepare for the lecture. There are three hours of lectures every week. The lectures will be prerecorded and available online. You are at the very least expected to go through the lecture slides and videos during the first time slot for the lecture, i.e., Tuesdays 1:00 to 3:00 pm. There will be a live Q&A session every week during the second time slot for the lecture, i.e., Thursdays 12:00 to 1:00 pm. During the live Q&A session, you can ask questions related to the lectures and take home exercises.

For details of days, times and rooms consult the timetables webpage.

Take home exercises will commence in week 1.

Please note that you will be **required** to submit work every week. Failure to do so may result in you failing the unit or being excluded from the exams.

DISCUSSION BOARDS

This unit makes use of discussion boards hosted within iLearn . Please post questions there; they are monitored by the staff on the unit.

REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS

This material for this unit is in part based on the following textbooks:

- Dwork, C. and Roth, A., 2014. The algorithmic foundations of differential privacy. *Foundations and Trends in Theoretical Computer Science*, *9*(3-4), pp.211-407. Available online: https://www.cis.upenn.edu/~aaroth/Papers/privacybook.pdf
- Yi, X., Paulet, R. and Bertino, E., 2014. *Homomorphic encryption and applications* (Vol. 3). Heidelberg: Springer. Available online: https://link.springer.com/content/pdf/10.100
 7%2F978-3-319-12229-8.pdf (accessible through MQ Library).

TECHNOLOGY USED AND REQUIRED

iLearn

iLearn is a Learning Management System that gives you access to lecture slides, lecture recordings, forums, assessment tasks, instructions for practicals, discussion forums and other resources.

Echo 360 (formerly known as iLecture)

Digital recordings of lectures are available. Read these instructions for details.

Technology Used

Anaconda, Jupyter Notebook with Python.

Unit Schedule

Week	Торіс
1	Introduction: Mathematical Background, Data Sharing, and Privacy Risks
2	De-identification and Privacy Attacks
3	Towards Provable Privacy: K-Anonymity and Related Definitions
4	Differential Privacy and its Applications
5	Cryptography Primer and Homomorphic Encryption
6	Machine Learning and Data Privacy
7	Mobile Privacy and Attacks
8	Privacy Protection for Mobile Apps
9	Web Privacy
10	Web Behaviour Re-identification and Defence
11	Online Tracking and Fingerprinting
12	Blacklists-based Tracking Prevention
13	Revision

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policie s.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit <u>Student Policies</u> (<u>https://students.mq.edu.au/su</u> <u>pport/study/policies</u>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit <u>Policy Central</u> (<u>https://policies.mq.e</u> <u>du.au</u>) and use the <u>search tool</u>.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than <u>eStudent</u>, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in <u>eStudent</u>. For more information visit <u>ask.mq.edu.au</u> or if you are a Global MBA student contact globalmba.support@mq.edu.au

Student Support

Macquarie University provides a range of support services for students. For details, visit <u>http://stu</u> dents.mq.edu.au/support/

Learning Skills

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to help you improve your marks and take control of your study.

- Getting help with your assignment
- Workshops
- StudyWise
- Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Services and Support

Students with a disability are encouraged to contact the **Disability Service** who can provide appropriate help with any issues that arise during their studies.

Student Enquiries

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

IT Help

For help with University computer systems and technology, visit <u>http://www.mq.edu.au/about_us/</u>offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy.

The policy applies to all who connect to the MQ network including students.

Grading Standards

At the end of the semester, you will receive a grade that reflects your achievement in the unit

- Fail (F): does not provide evidence of attainment of all learning outcomes. There is missing or partial or superficial or faulty understanding and application of the fundamental concepts in the field of study; and incomplete, confusing or lacking communication of ideas in ways that give little attention to the conventions of the discipline.
- **Pass (P)**: provides sufficient evidence of the achievement of learning outcomes. There is demonstration of understanding and application of fundamental concepts of the field of study; and communication of information and ideas adequately in terms of the conventions of the discipline. The learning attainment is considered satisfactory or adequate or competent or capable in relation to the specified outcomes.
- Credit (Cr): provides evidence of learning that goes beyond replication of content knowledge or skills relevant to the learning outcomes. There is demonstration of substantial understanding of fundamental concepts in the field of study and the ability to apply these concepts in a variety of contexts; plus communication of ideas fluently and clearly in terms of the conventions of the discipline.
- Distinction (D): provides evidence of integration and evaluation of critical ideas, principles and theories, distinctive insight and ability in applying relevant skills and concepts in relation to learning outcomes. There is demonstration of frequent originality in defining and analysing issues or problems and providing solutions; and the use of means of communication appropriate to the discipline and the audience.
- High Distinction (HD): provides consistent evidence of deep and critical understanding in relation to the learning outcomes. There is substantial originality and insight in identifying, generating and communicating competing arguments, perspectives or problem solving approaches; critical evaluation of problems, their solutions and their implications; creativity in application.

Your final grade depends on your performance in each assessment task and on your ability to perform well enough on the hurdle assessment tasks.

For each task, you receive a mark that reflects your standard of performance. Then the different component marks are added up to determine an aggregated mark out of 100. In order to pass the unit, this aggregated mark needs to be at least 50.

Note that none of the assessment tasks in this unit are a hurdle requirement. However, if you do not make a reasonable attempt at the assessments, you will be unlikely to pass the unit.

Your final grade is then a direct reflection of the aggregated mark (provided that you satisfy the hurdle requirements) according to the following:

- 85-100 for HD
- 75-84 for **D**
- 65-74 for CR
- 50-64 for **P**

If you receive special consideration for the module exams, a supplementary exam will be scheduled in the week of the regular exam offering. By making a special consideration application for the module exams you are declaring yourself available for a resit during the supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the policy prior to submitting an application. You can check the supplementary exam information page on FSE101 in iLearn (bit.ly/FSESupp) for dates, and approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

If you are given a second opportunity to sit the final examination as a result of failing to meet the minimum mark required, you will be offered that chance during the same supplementary examination period and will be notified of the exact day and time after the publication of final results for the unit.
