Session 2 Learning and Teaching Update

The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of [units with mandatory on-campus classes/teaching activities](#).

Visit the [MQ COVID-19 information page](#) for more detail.

Unit description

This unit is the first of the two units in cost and management accounting that are required for accreditation with CPA Australia, the Chartered Accountants Australia and New Zealand (CAANZ) and the Institute of Public Accountants (IPA). The unit explains how cost information is generated and used in organisations for decision making purposes. There are three main parts to the unit: 1) using costs for decision making; 2) costing techniques (job/process costing and cost allocations); and 3) budget setting and evaluating performance against the budget. By the end of the unit, students are able to distinguish between the various product costing techniques available, solve problems by identifying and selecting appropriate courses of action, and demonstrate an understanding of budgeting techniques and the behavioural issues associated with budgeting practices.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Distinguish between management and financial accounting and assess business operations using various product costing, budgeting and decision-making techniques

ULO2: Discuss and analyse management accounting issues and information.

ULO3: Use Microsoft Excel for fundamental managerial accounting planning, control and evaluation tasks.

ULO4: Apply appropriate management accounting concepts and techniques to formulate informed solutions to business problems.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Classes

During the session, students should attend weekly three hours classes per topic consisting of a one-and half hour lecture and a one-and-half hour tutorial. The lecture will be online (recorded). The lecture will also be available via echo on the unit website. Tutorials are available either face to face on campus or online via zoom. Students are advised to note that any changes to tutorial classes must be made online through eStudent. Students wishing to change their tutorial time should login to eStudent and enrol in a class where there is a vacancy. Staff members WILL NOT deal with tutorial changes unless there are exceptional circumstances. It is each student's responsibility to know which tutorial group they have been allocated to. Students will not be awarded any tutorial marks unless they attend the class in which they are formally enrolled. The timetable for classes can be found on the University web site at: <http://www.timetables.mq.edu.au>.

- Other relevant material

You are encouraged to regularly check the website and use it as an information and resource center to assist with your learning.

Teaching and Learning Strategy

The course is structured around a 1.5 hour lecture and a 1.5 hour tutorial per topic. Lectures are intended to provide students with an overview of the main concepts and techniques. Lectures may not cover all of the material and students are expected to read all of the prescribed references prior to the lecture. Tutorials will be run on a workshop basis with students being

given the opportunity to apply the concepts to additional problems and exercises. The tutorials are designed to provide an interactive environment in which students will be able to discuss issues and problems with each other, and their tutor, in order to improve their understanding of material. Regular class attendance, reading of prescribed references and the completion of tutorial and revision questions are essential for satisfactory progress in this course.

Lecture slides and additional material for tutorials and lectures will be available to download via the unit website. Any other announcement regarding the unit will also be available from the website.
