### Unit description

Introducing students to the radio broadcasting industry, this unit has a large practical component for radio and podcast. Its main aim is to enable students to produce creative and or journalistic work, including content suitable for broadcast on Sydney station, 2SER.

Students gain a broad understanding of program making and sound production media, with attention to public, commercial and community radio forms. The unit also introduces students to the rapidly expanding realm of podcasting and online radio.

The workshop component of the unit concentrates on techniques of recording and producing pre-recorded sound 'stories'. Through hands-on production classes in the radio lab, students learn to develop skills in interviewing, story construction and voice presentation, and learn to research, record, mix, and write for radio and podcast.
