Session 2 Learning and Teaching Update

The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of [units with mandatory on-campus classes/teaching activities](#).

Visit the [MQ COVID-19 information page](#) for more detail.

Unit description

This unit focuses on topics concerned with issues in both financial and management accounting in international contexts. Particular attention is given to the impact of national culture and to how an understanding of cultural differences provides insights into cross-national differences in financial reporting practices and management behaviour. Current issues in accounting standard-setting in an international context, including the debate on international accounting convergence, and problems facing international companies in organising, managing, planning, controlling and evaluating their global operations are examined. A solid understanding of cultural influences on international accounting practices is a requirement for any advanced study of accounting theory. This unit provides students with essential internationally contextualised accounting experiences that develop the concepts and skills necessary for advanced research in accounting and corporate governance.
