Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Notice
As part of Phase 3 of our return to campus plan, most units will now run tutorials, seminars and other small group activities on campus, and most will keep an online version available to those students unable to return or those who choose to continue their studies online.

To check the availability of face-to-face activities for your unit, please go to timetable viewer. To check detailed information on unit assessments visit your unit’s iLearn space or consult your unit convenor.

Co-badged status

Unit description
This unit covers the analysis of cash flows dependent on uncertain events due to mortality and other factors. It introduces the concept of the expected present value of payments under various life insurance contracts, including whole life, term and endowment assurances; immediate and temporary annuities; and deferred assurances and annuities. The standard international actuarial notation in life insurance is used extensively. Probability models and life tables are used to calculate the expected present values accurately based on ultimate or select mortality. Furthermore, important concepts of pricing and reserving for future contingent liabilities are discussed. Equations of value are established to calculate net premiums. Prospective and retrospective net premium reserves required to meet future liabilities are determined and compared. Techniques for the valuation of annuity and assurance products involving two lives are developed. Students gaining a credit average in both ACST8081 and ACST8082 (minimum mark of 60 on both units) will satisfy the requirements for exemption from the professional subject CM1 of the Actuaries Institute.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://students.mq.edu.au/important-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Interpret and apply simple survival models as well as ultimate and select mortality rates.
ULO2: Apply contingent payment techniques to determine actuarial present values and variances of benefits for simple life insurance contracts and for contracts contingent on two lives.

ULO3: Calculate premiums and policy values for various life insurance contracts, both with and without allowance for operating expenses.

ULO4: Analyse the profit arising from life insurance contracts in simple scenarios.

ULO5: Identify key unit concepts and to integrate them to solve and analyse novel problems.

ULO6: Explain how the contingent payment techniques can be applied to complex life-contingent problems.

**General Assessment Information**

Assessment criteria for all assessment tasks will be provided on the unit iLearn site.

It is the responsibility of students to view their marks for each within-session-assessment on iLearn within 20 days of posting. If there are any discrepancies, students must contact the unit convenor immediately. Failure to do so will mean that queries received after the release of final results regarding assessment tasks (not including the final exam mark) will not be addressed.

**Late submissions and extensions**

**Tasks 10% or less** – No extensions will be granted. Students who have not submitted the task prior to the deadline will be awarded a mark of 0 for the task, except for cases in which an application for special consideration is made and approved.

**Tasks above 10%** - No extensions will be granted. There will be a deduction of 10% of the total available marks made from the total awarded mark for each 24 hour period or part thereof that the submission is late (for example, 25 hours late in submission – 20% penalty). This penalty does not apply for cases in which an application for special consideration is made and approved. No submission will be accepted after solutions have been posted.

**Assessment Tasks**

Online Quiz
Assessment Type: Quiz/Test
Indicative Time on Task: 2 hours
Due: Week 3
Weighting: 5%

You should complete the quiz online, available on iLearn.

On successful completion you will be able to:
- Interpret and apply simple survival models as well as ultimate and select mortality rates.

Assignment
Assessment Type: Quantitative analysis task
Indicative Time on Task: 15 hours
Due: Week 8
Weighting: 15%

This is an individual assignment which focuses on problem solving using Excel spreadsheet.

On successful completion you will be able to:
- Interpret and apply simple survival models as well as ultimate and select mortality rates.
- Apply contingent payment techniques to determine actuarial present values and variances of benefits for simple life insurance contracts and for contracts contingent on two lives.
- Calculate premiums and policy values for various life insurance contracts, both with and without allowance for operating expenses.
- Identify key unit concepts and to integrate them to solve and analyse novel problems.
- Explain how the contingent payment techniques can be applied to complex life-contingent problems.

Class Test
Assessment Type: Quiz/Test
Indicative Time on Task: 10 hours
Due: Week 10
Weighting: 20%

The test will be approximately 90 minutes, to be held during class time.

On successful completion you will be able to:
- Interpret and apply simple survival models as well as ultimate and select mortality rates.
• Apply contingent payment techniques to determine actuarial present values and variances of benefits for simple life insurance contracts and for contracts contingent on two lives.
• Calculate premiums and policy values for various life insurance contracts, both with and without allowance for operating expenses.
• Analyse the profit arising from life insurance contracts in simple scenarios.
• Identify key unit concepts and to integrate them to solve and analyse novel problems.

Final Exam
Assessment Type: Examination
Indicative Time on Task: 28 hours
Due: Exam period
Weighting: 60%

The final examination will be closed book, a three-hour written paper with ten minutes reading time, to be held during the University Examination period.

On successful completion you will be able to:
• Interpret and apply simple survival models as well as ultimate and select mortality rates.
• Apply contingent payment techniques to determine actuarial present values and variances of benefits for simple life insurance contracts and for contracts contingent on two lives.
• Calculate premiums and policy values for various life insurance contracts, both with and without allowance for operating expenses.
• Analyse the profit arising from life insurance contracts in simple scenarios.
• Identify key unit concepts and to integrate them to solve and analyse novel problems.
• Explain how the contingent payment techniques can be applied to complex life-contingent problems.

1 If you need help with your assignment, please contact:
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation
Delivery and Resources

Classes

It is intended that learning this semester will be a combination of pre-recorded online and face-to-face.

The timetables for classes can be found on the University website at: https://timetables.mq.edu.au/2021/.

Pre-recorded lectures will be made available early in the week and students are expected to have watched/listened to them prior to attending any live or face-to-face classes.

Classes on tutorial questions will commence in week 2 of the session. Students are expected to have attempted the previous weeks tutorial questions before coming to this class.

Required and Recommended Texts and/or Materials

No textbooks are prescribed for this unit. Detailed notes, exercises and solutions are available on the unit's web site.

Technology Used and Required

You will require a calculator. For the final exam, you may only use non-programmable calculators which are not able to store text.

You will also need to be able to construct spreadsheets for tutorial exercises. You will also be required to use a spreadsheet for the assignment. We do not prescribe any particular brand of spreadsheet, although materials will be provided in MS Excel.

You require access to a computer to access material on the unit's iLearn web site.

Required unit materials

Course materials, including pre-recorded lectures, are available on the iLearn page.

To access the teaching website, go to http://ilearn.mq.edu.au and login using your usual login and password.

Inherent requirements

Attendance of the weekly lectures and tutorials, either via face-to-face venue or the pre-uploaded recordings.

Unit Schedule

The following schedule of topics is also provided as a separate printer-friendly document in the administration section of this unit's iLearn web site.

<table>

## Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**Learning Skills**

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to help you improve your marks and take control of your study.

- Getting help with your assignment
- Workshops
- StudyWise
- Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

**Student Enquiry Service**

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

**Equity Support**

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.
IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
