Unit description
The unit provides an understanding of the finance industry and its integral role in the modern economy. The focus is on a high level, fully integrated overview of the major participants, their roles, interactions and the purpose they endeavour to fill for all stakeholders in the economy. The key structures of the finance system are examined, and how they usually work and sometimes do not work. Case studies of actual events and participants will be used to provide a sense of the application of finance in the real world - what actually happens as well as what should happen.

Learning and Teaching Activities
Strategy

Programs in the Applied Finance Centre adopt a deep teaching and learning strategy in which students acquire and retain knowledge and also are able to make sense of the issues and concepts and apply them in the "real world". The program relies heavily on student engagement and participation by: (a) Continuous learning throughout the term. This is encouraged through a combination of students undertaking prescribed reading throughout the units and/or completion of practice problems, online activities, case studies, assignments, class discussions, etc and interaction via forums; and (b) Assessments, which enable the student to demonstrate his/her understanding of the learning objectives achieved through the continuous learning.

Student Participation

This is an online unit. Students participate in this unit by: (a) Actively engaging with the required readings of this unit; (b) Working systematically through and completing online activities; (c) Interacting in forums; and (d) Completing all assessment tasks
