Unit description
Qualitative insights provide organisations with an in-depth perspective of emerging market
trends and novel consumer behaviours. Organisations use qualitative insights to better
engage and deliver value to their customers, identify new opportunities and fuel their
competitive advantage.

This unit equips students with knowledge of the role, theory and methods used in qualitative
research. Students will develop skills in qualitative research design, data collection and
analysis, including the use of different software packages. Students will also learn how to
interpret and translate results to deliver strategic insights, and effectively deliver their findings
through both oral and written communication.
