Unit description This unit explores the development and practice of textual analysis, literary theory, and creative practice as research. Topics range from the notion of the canon and interdisciplinarity in literary reception and interpretation, to formal, linguistic, cultural and cognitive approaches to textual meaning making and creative practice. For students focused on creative writing we consider how creative practice can produce a framework for integrated research design. Students will analyse and evaluate the relationship between literary works, theoretical approaches and creative production, focusing on the ways in which theories can illuminate various ways of reading texts and/or how creative practice can shape theory.
