Workshop activities provide opportunities to internalise your learning. These activities also allow you to engage in discussions with your peers and share your thoughts, help you explain your points of view, and develop not only your own knowledge, but also assist your fellow classmates to gain a better understanding of the topic. The group component (10 marks) is based on weekly small group activities. The individual component (10 marks) is based on five 150-word answers to questions, or case study questions.

On successful completion you will be able to:

- Evaluate and explain theories, concepts and principles of consumer decision-making and behaviour.

- Synthesise relevant literature streams and conduct a research project

The Literature review is specifically designed to facilitate your abilities to research a topic of study by identifying relevant literature (e.g., journal articles) about one specific topic that you can choose from the unit weekly topics. You are to identify gaps or limitations in previous research, and synthesize new knowledge into a written literature review. For this assessment task, you are required to discuss literature review within its appropriate and wider context, consider the theoretical underpinnings of the journal articles reviewed (and not just the results), present a coherent and structured discussion of the literature including both depth and breadth of analysis, use the review to identify gaps or limitations in prior research, and show original thought to constructively criticise existing literature. Students must support their discussion with clear evidence (e.g., high quality articles accessed from top ranking journals) that support, explain and critique the consumer behaviour theory / concept chosen.
