Session 2 Learning and Teaching Update

The decision has been made to conduct study online for the remainder of Session 2 for all units WITHOUT mandatory on-campus learning activities. Exams for Session 2 will also be online where possible to do so.

This is due to the extension of the lockdown orders and to provide certainty around arrangements for the remainder of Session 2. We hope to return to campus beyond Session 2 as soon as it is safe and appropriate to do so.

Some classes/teaching activities cannot be moved online and must be taught on campus. You should already know if you are in one of these classes/teaching activities and your unit convenor will provide you with more information via iLearn. If you want to confirm, see the list of [units with mandatory on-campus classes/teaching activities](#).

Visit the [MQ COVID-19 information page](#) for more detail.

Unit description

This unit provides a geographical perspective on development issues facing cities of the global South. A series of case studies are drawn upon, particularly from the Asia Pacific region, to highlight key social, economic, political and environmental issues, how they are being addressed and hopeful ways forward. The unit is structured around five themes, each providing a different viewpoint on cities and development. First, the unit introduces the concept of the global South and key urban development theories. It then explores how shared histories of colonialism and post-colonial development have shaped cities in the global South. Section three explores life in the city, looking at how people make a living, housing challenges, informality, mobility, and inequality. Section four concentrates upon environmental issues, the sustainable development goals, and how cities are entangled in processes of social and ecological change. Finally the unit reviews a range of policy interventions and considers the role of different actors in responding to development challenges and pursuing more just and resilient urban futures. Throughout the unit students will have the opportunity to focus in on a particular city of their choice and develop a deep understanding its past, present and future.
